

FINE NEW UNITS AT HIGH SCHOOL

Continued from Page One. On the second floor, in addition to the galleries, a second smaller gymnasium room, capable of being thrown entirely open on one side, has been provided. This room will be used as a girls' corrective gymnasium, with special apparatus for the development of correct posture, and for nursing classes, which Principal Wood expects to have added to the school curriculum in the near future.

The gymnasium floor itself will be completely equipped with late type devices including flying rings and parallel bars. There will be two basketball courts, and by the use of the folding doors, when closed, as a backstop, four handball courts will be provided.

Another section of the building program, which encloses on three sides what eventually will be an entirely enclosed court in the rear classroom building, will be ready for use next fall also. This section includes new classrooms which will take care of pupils now overflowing from the rooms of the old building, a library, new study hall which will release the present one for classroom work, and the school commercial department.

The court, to which the fourth side will be added later when appropriations are made to complete the entire plan, is flanked by arched galleries, paved with red tile, upon which the court classrooms open. The main portion of the court also will be paved in red tile, with a fountain in its center constructed of decorative tiles made by the Yaqui Indians of Mexico, to beautify grounds.

The landscaping program, which goes hand in hand with the new building project, will be partly completed by the opening of the fall term. An agriculturist and a gardener will be on duty all summer, assisted by members of the high school class in agriculture, who will be assigned to the work. The boys recently landscaped several new Torrance homes, and will be helping to lay out the decorative system of the school grounds. The landscape plan will include a drive from Carson street to pass behind the group of buildings, development of the school's pine grove into a park, and a general effect of banked flowers and shrubs over all of the 29-acre tract.

Cotton Compress Plant Will Aid Harbor District

100 Persons Will Be Employed in New Industry Near Here

The California Cotton Compress and Warehouse Company will bring more than 100 new families into the harbor district and the proximity of Lomita. The company's proposed \$500,000 plant will benefit this locality, according to Messrs. Sidelbotham and Gilbert, who engineered the deal.

Women's Club Has Thanks for Stores

The committee in charge of the Women's Club bazaar held last Friday express sincere appreciation to the following merchants, and all others who contributed to the success of the affair: American Meat Market, American Beauty Shop, Barkdull Meat Market, Baird Hardware Company, J. W. AUTO TIRES ARE PERISHABLE

How often have you noticed one tire go 7000 miles and another of the same make go 20,000 miles? The reason is that rubber deteriorates with age about as quickly as by wear. Proof of this—carry a spare tire for twelve months, then put it on a wheel and it lasts only a short time. The life of the rubber is gone. We have hit upon a plan that will give all auto users—save their money in tires than any other way. We will handle all tires like we do fruits and vegetables—quick turnover—cutting down the time from manufacturer to consumer. Leave your order with any Piggly Wiggly store today, and within 48 hours the tires will be at that particular store for you, right fresh from the manufacturer's stock. Every tire guaranteed to satisfy you, the same as every other product that we handle. And the prices are right. Save for yourself on tires. They are manufactured by the U. S. Rubber Company. The following prices prevail:

HARTFORD CORD TIRES 30x3 1/2 Oversize, each . . . \$ 8.25 31x4 Straight-side, each . . . 13.10 32x4 Straight-side, each . . . 13.75 33x4 1/2 Straight-side, each . . . 19.50 29x4.40 Balloon, each . . . 9.10 30x4.95 Balloon, each . . . 13.50

HARTCO CORDS 30x3 1/2 Oversize, each . . . \$6.95 29x4.40 Balloon, each . . . 7.05 Ask our clerk for prices on other sizes. We also carry a full line of red and grey tubes at special low prices.

Torrance scouts conducted their May rally last Friday evening in the elementary school auditorium, 77 scouts, 54 parents, and about 100 other interested friends being present. In point of attendance, both as to scouts and others, it was the largest rally that has been conducted this year.

Troop 3 won three contests: presence of parents, friction fire-making—the troop being represented by Charles Ruppel, and knot-tying—the troop representative being John Jones. Troop 4 won three contests: color detail—Raymond Flood, Robert Hannon and Charles Kissinger; knife-work contest, the troop representative being Kenneth Clutter; and the signaling contest, the sender being Egbert Merrill and the receiver Merton Gilbert. The tie between the two troops was decided by the signaling contest results, and the rally pennant was awarded Troop 4.

The personal appearance contest resulted as follows, for the respective troops: Troop 1, Clarence Carpenter; Troop 2, Richard Pullman; and Troop 4, Kenneth Clutter. In a final contest between the troop winners the book award to the best dressed scout at the rally was awarded to Kenneth Clutter, Troop 4. Second class badges were awarded to Raymond Schumacher, Troop 1, Harry Almsworth, Gordon Arnold, Douglas Brumpton, Francis Lava, Allan McClure, and Sidney Nickerson, Troop 4. First class badges were awarded to Harwood Clark and Earl Tavan, Troop 3, and Dallas Danford, Troop 4. Thirty-four merit badges were presented to 18 first class scouts, and Star badges representing the approval of at least five merit badge applications, to Clarence Carpenter and John Young, Troop 1, and George Kyle and Wilson Page, Troop 4. In the name of the Red Cross, junior life-saving badges were presented to Raymond Flood and Egbert Merrill, Troop 4. After the conclusion of the regular program games were played and cake and cocoa served.

Music Courses at Summer Sessions

String training and wind instrument training classes, piano, community singing and choral conducting, ear training and keyboard harmony are included in the splendid program of music study announced for the 1927 summer session of the University of Southern California, from June to August 30. The place of music in education, the trend of public school music, and the relation of music to the social life of the community will be covered in a course in organization, administration, and methods of public school music; and one in conducting the school orchestra is also scheduled. Using the Friday orchestra and the Saturday night programs of the Hollywood Bowl for review, a course in "History and Appreciation of the Symphony Orchestra and Its Music" will be given, as well as one in the "History and Literature of Music, to be illustrated by records. Mr. and Mrs. Frank Reasenor of Los Angeles and Mr. and Mrs. C. W. Hudson visited the orange show at Anaheim Sunday evening.

Firestone GUM-DIPPED TIRES

Firestone Round Tread Balloon Note balanced tread with even wear—no excess or wasted rubber. Flexes freely with Gum-Dipped carcass—easier riding—easier steering. "Built for Service"

Firestone Gum-Dipped Balloon with its scientifically designed tread permits free flexing, easier riding, extra comfort and safety. Note unbalanced tread with uneven wear—excess rubber at shoulders wasted, stiffening tire, making it harder riding and harder steering.

OLDFIELD TIRES at Low Cash Prices 30x3 Fabric . \$5.85 30x3 1/2 Fabric . 6.85 30x3 1/2 Cord . 7.35 29x4.40 Balloon 8.40 32x4 Cord . 13.40 31x5.25 Balloon 15.35 33x6.00 Balloon 18.35 Oldfield Tubes also priced low

MANY Firestone Dealers are prepared to take in your old tires, offering you a liberal allowance on a new set of Gum-Dipped Balloons. Firestone Dealers are given the advantages of attending Tire Educational Meetings held throughout the country, where tire design and construction are discussed. The sections of used tires reproduced here are a part of this program. Study these two sections and you, too, will understand what Firestone means by tires built for service and tires made to sell. The Firestone Gum-Dipped Balloon with its scientifically designed tread permits free flexing, easier riding, extra comfort and safety. The balloon tire with heavy, flat tread design is obviously stiffer and rides harder. The excess rubber, placed for appearance at the edges of the tread, is not only wasted but produces hindering action causing ply separation and "shoulder breaks." Firestone designed and manufactures Oldfield Tires and Tubes, distributing them direct to Firestone Dealers only, through 148 Factory Warehouses. This efficient and economical distribution assures tire buyers everywhere, clean, fresh stocks of Firestone and Oldfield Tires in all types and sizes, and has helped to make possible today's remarkably low prices—the lowest in tire history. See the Firestone Dealer today.
